ECE 447

Lesson 02
Communication Systems Overview

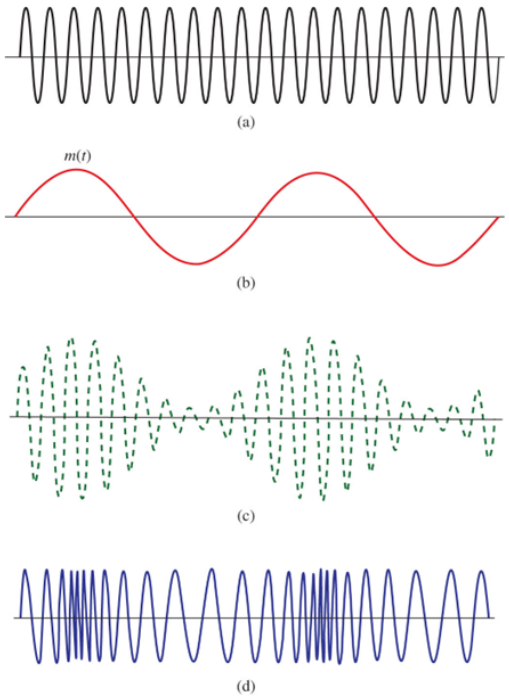

UNITED STATES
AIR FORCE
ACADEMY

Schedule and Admin

- Schedule
- Admin
  - Skills review due to Gradescope by 1159 of M4 (Friday, 14 Aug)
  - Lab 1 next time! Read through ahead of time and make sure MATLAB/Simulink are ready to go

MODULATION

- What is modulation?
  - Using a *baseband* message signal to change some parameter (amplitude, frequency, phase) of a carrier signal
  - Carrier is a high frequency sinusoid
  - **Modulating** signal = *baseband* message signal
  - **Modulated** signal = modified carrier signal; *bandpass* signal; aka *frequency translated* signal
- Why use modulation?

What about the other parts of a Comm Sys?
